Fall 2016-2017
AYBU Computer Engineering Department
CENG101 – Introduction to Comp. Eng.
Instructor: M. Abdullah Bulbul

Seminar Report

Presenter: Emre ÇAMALAN
Company: Barikat Bilişim
Presentation date: 09/12/2016

Short summary of the talk:

The talk was about his sector, Information Security; it's risks and delicacies. The talker tried to motivate and prepare us for the industry and the competition in it.

What have you learned?

I've learned that Information Security sector is so risky and stressful, yet fun and exciting to be in it; what is Information Security Consultant and what's its roles in a company. Also I've learned that we need to decide whether we should start our own company or work for someone else's.

Which parts of the presentation were particularly important/useful?

I don't think I can take a place in a sector which is so risky and stressful, so that the part about his sector wasn't so useful for me. But the part he talked about his life experiences, the companies he worked for and their requirements, his motivational talk about being ahead in the industry were pretty useful for general.

Comment on the talk, the presenter, the company, and their projects.

Talk was useful in overall. I've learned many things about the industry. The presenter Emre ÇAMALAN is a successful person and I'm glad we could learn from his experiences throughout his business life. He didn't talk much about his company, Barikat Bilişim; he was more focused to inform us about the industry itself rather than advertising the company he is working for. According to him, he started making his own projects in a young age, one of his project about visual process (A tennis game can be played vertically with one camera) took place in a fair in Germany, which is a remarkable success at such a young age.
